CUSTOM RATES SURVEY

LIVESTOCK OPERATIONS

1985

Alberta
AGRICULTURE
STATISTICS BRANCH
427 4011

88-05643/

PREFACE

The Custom Rate Survey is conducted for Alberta Agriculture as a cooperative effort involving the Department Statistics Branch and Farm Business Management Branch.

The data presented in this report was obtained by contacting custom operators and dealers and thus represent actual charges. Please note that some instances may be GNR (Good Neighbor Rates) as opposed to CR (Commercial Rates). The reader should be aware that varying conditions in different areas of the province can significantly affect the rates charged.

The intent of the survey is to provide producers with additional information to help with their farm management decisions. The quality of data is dependent on the cooperation received by producers as well as commercial custom operators. We would like to thank all those who were so willing in helping to provide information. If you are involved in any custom operations and have not been contacted but wish to contribute please call the following numbers or contact your local District Agriculturist.

Notes

- No reports are listed for Region 6 due to the limited number of custom feedlots in that region. Existing operators did not wish to be identified. Region 6 is generally limited in most custom operations but this is most evident with custom feeding.
- Survey results show that the form of lease is generally verbal with a written lease used for unfamiliar customers.
- The type and cost of barley fed varies according to region and processing charges. Dry barley is fed throughout the province. The majority of high moisture, reconstituted and tempered barley is fed in southern and central regions.
- Provincially, the cost of silage ranged from $31.00 per tonne to $46.00 per tonne with the most common being in the $34.00 to $37.00 per tonne range. Silage costs were highest in the southern regions.
- Provincially, the most common employee to animal ratio was in the 1:500 to 1:1000 range with a few operators as high as 1:1200 and smaller operators as low as 1:200.
